ABOUT **Us**

Electrorail Heavy Equipment Private Limited (EHEPL) is dedicated to providing strong, reliable, and high-performance heavy equipment solutions for a wide range of industrial and infrastructure projects. With solid technical expertise and a focus on safety, durability, and customer satisfaction, we ensure that every piece of equipment delivers long-lasting value and dependable results.

Reliable machinery built for tough project conditions.

Commitment to quality, durability, and performance.

WHY CHOOSE **Us**

Choose us at **ELECTRORAIL HEAVY EQUIPMENT PRIVATE LIMITED** for our strong commitment to providing Reliable, Durable, and High-Performance heavy equipment solutions. We carefully plan and execute every project to ensure it is cost-effective, efficient, and precise, supported by clear communication and timely delivery. With a dedicated team of industry experts, we guarantee excellence in every service we offer ensuring your operations run smoothly and your projects achieve long-lasting success.

HIGH PRECISION MACHINED COMPONENTS

At Electrorail Heavy Equipment Private Limited, we specialize in the production of high precision machined components that meet the most stringent standards of accuracy and quality. Our state-of-the-art machining facility is equipped with advanced CNC machines and cutting-edge technology, enabling us to produce complex and precise components for a wide range of industries.

VISION, MISSION, CORE VALUES

OUR VISION

To prioritize customers by delivering innovative, quality-engineered products and pioneering new technologies to enrich industries globally.

OUR MISSION

Our mission is to innovate relentlessly, ensuring client satisfaction through superior products and services, while fostering sustainable growth and global expansion.

CORE VALUES

Reliability, Quality, Cost-effectiveness, Efficiency, Timeliness, Commitment to Excellence, and a Dedicated Team of Professionals.

RAILWAY COMPONENTS

We manufacture railway components and application-specific engineered products in line with client drawings and technical requirements. Supported by advanced machinery and controlled production processes, we ensure high precision, consistency, and reliability across every component we deliver.

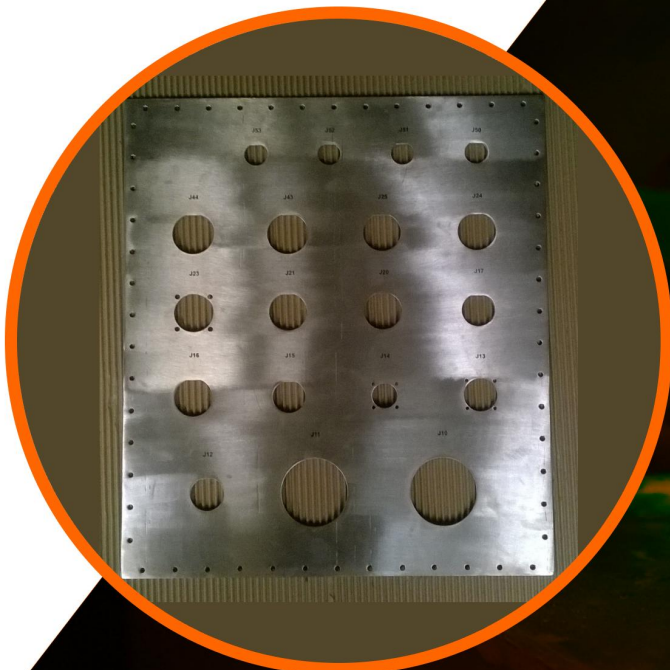

STRUCTURAL FABRICATION

We assist our customers in designing and analyzing the production process and then custom-make the product according to the needs of the client. Our Structural fabrication work has gained the appreciation and now we are spreading rapidly all across the world.

SHEET METAL FABRICATION

We specialize ourselves in sheet metal fabrication and tailor-made products according to the requirements of the client. We encompass high-end machinery to carry out the procedure of precision and excellence.

TANKS & VESSELS

At Electrorail Heavy Equipment Private Limited, we specialize in the design and manufacture of high-quality tanks and vessels tailored to meet the specific needs of various industries. With our advanced fabrication techniques and decades of experience, we ensure that our tanks and vessels deliver exceptional performance, durability, and safety.

GENERAL FABRICATION

At Electrorail Heavy Equipment Private Limited, our General Fabrication services offer comprehensive solutions for a wide range of industrial needs. With over four decades of experience, we excel in delivering custom-engineered products that meet the highest standards of quality and precision.

ELECTRORAIL

HEAVY EQUIPMENT PRIVATE LIMITED

our esteemed sister company. As partners under the same umbrella, we leverage our collective expertise and resources to deliver unparalleled solutions to our clients. With a shared commitment to excellence, innovation, and customer satisfaction

SOPHISTICATED INSTRUMENT **SETUPS**

Coordinate Measuring Machine:
Precise measurement of complex geometries.

Hardness Tester:
Determines material durability for specific applications.

Contracer Measuring Machine:
Detailed assessment of intricate component features.

Skilled Quality Control Team:
Collaborates with precision instruments, consistently surpassing industry requirements for client satisfaction.

Roughness Tester:
Evaluation of surface finish for desired texture and quality.
